Half-day Training

Thursday 11th April 2019

1:00pm—5:00pm

Venue — Stirling

The general perception of VSA is that it is a problem of the past. **IT IS NOT.** Re-Solv are providing this training for NHS Forth Valley to highlight effective methods of communicating the dangers of VSA—the greatest of which is **SUDDEN SNIFFING DEATH**

Workshop Objectives

Delegates will -

- gain a solid understanding of what VSA is
- learn the scope of the products of abuse
- be able to identify signs and symptoms
- gain an understanding of the motivations behind VSA
- develop an understanding of the psychoactive effects of VSA
- be able to develop more informed policy and practice in their workplace and

Most importantly, delegates will learn what NOT to do with a suspected VSA incident.
